- Fast and convenient way to export your customers
- Works with all Magento versions from 1.7.x to 1.9.x versions
- Code not encrypted and fully customizable
- Free Up to 20 hours Support
- 

## Installation

### Backup your data

Backup the database and your store's web directory.

## Disable Compilation

In the Magento admin panel, go to System->Tools->Compilation. In case "Compiler Status" is "Enabled", click on the "Disable" button (in case the status is disabled you can skip this step):

## Download and Extract

Download and extract (unzip) the extension's contents on your computer. Navigate inside the extracted folder.

## Upload files

Using a FTP client, upload the content of the extension directory to the store's document root, so that the app directory in the extension folder overwrites the app directory on the server. If asked to replace any files, select "Yes".

## Clear the cache

In the Magento admin panel, go to System->Cache Management and press the "Flush Magento Cache" button:

## Configuration

Please refer readme.html file in the extension for detailed configuration

## Troubleshooting

**When I try to access your extension's configuration at Dashboard->Webcreta->Track Order, I get a 404 error**

Logout & Login back into the Magento admin panel.
